

### Remarks

Applicants have canceled claims 2-3, 5-18, 20-58, 60-65, and 67-71. Applicants have added new claims 72-79. Basis for these new claims can be found in Examples 193-194, 545, 642-643, and 695-697.

In Claim 1, Applicants have amended in the definition of several terms that can be found in the definition section of the specification on pages 8-10, Applicants have made amendments for clarification, and Applicants have amended the definitions of several terms to include inadvertently omitted members of the Markush as explained in the following paragraph. None of these amendments constitute new matter.

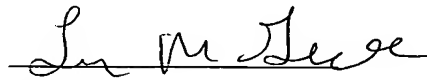

Applicants have amended the definition of  $R^{13}$  to include methoxy and hydroxy. Basis for the amendment can be found in Examples 49-52. Applicants have amended the definition of  $R^4$  to include  $SO_2CH_3$ . Basis for the amendment can be found in Example 95. Applicants have amended the definition of  $R^2$  to include  $C(O)N$ -phenyl. Basis for the amendment can be found in Example 103. Applicants have amended the definition of  $R^{19}$  to include  $CO-(C_1-C_4 \text{ alkyl})$ . Basis for the amendment can be found in Example 152. Applicants have amended the definition of  $R^{16}$  to include  $SO_2CH_3$ . Basis for the amendment can be found in Example 176. Applicants have amended the definition of  $R^7$  to include 3-oxo-indanyl. Basis for the amendment can be found in Example 310. Applicants have amended the definition of  $R^7$  to include fluoren-9-yl substituted with hydroxy. Basis for the amendment can be found in Example 372. Applicants have amended the definition of  $R^{10}$  to include  $CO_2CH_2CO_2CH_2CH_3$  and  $CH_2OH$ . Basis for these amendments can be found in Example 603 and Example 608, respectively. Applicants have amended the definition of  $R^7$  to correct an obvious typographical error.  $SiCH_3$  should read  $Si(CH_3)_3$ . Basis for the amendment can be found in Example 677.

Applicants have amended the specification to correct a typographical error in the name of five compounds (Examples 33, 34, 432, 579, and 580). The word "cyclohexyl" was omitted from each of these examples. It would be obvious to one skilled in the art from the preparation of these compounds as well as from the mass spectrometry data that this is an inadvertent omission. As such, these amendments do not represent new matter.

Please charge any fees or credit any overpayment in connection with this application which may be required by this or any related paper to Deposit Account No. 05-0840.

If the Examiner has any questions, or would like to discuss any matters in connection with this application, the Examiner is invited to contact the undersigned at (317) 277-3537.

Respectfully submitted,
